To make a vaccine appointment, please contact:
Dan Brunetti, Home Care Human Resources Manager
215.371.3477

Getting vaccinated is safe & helps everyone.

Millions of people in the United States have already received COVID-19 vaccines, and these vaccines have undergone intensive safety monitoring.

✓ It will keep you, your family members, our clients and co-workers safe.

✓ It will keep you from getting sick or seriously ill from COVID-19.

✓ You'll slow the spread and in turn, save lives.

Many members of the Abramson Senior Care staff have already gotten vaccinated. **They share their stories here.**

"I got vaccinated because it is important to protect yourself. As a healthcare worker, I am in and out of patients' homes and I do not want to get the virus and I don't want to make others sick. At first I was hesitant to get the vaccine, but my sister is a nurse and she got it and she was fine, so I knew it was ok. I want to tell others that are hesitant not to believe the jokes and misinformation – but to get the shot.

— Mildred (Chris) Harris

"I have worked in the ICU and have seen what COVID can do. I saw people who were healthy become so sick, especially African Americans. Many patients in the ICU died and those that survived have long-lasting health issues. I hope others don't hesitate to get the vaccine because they are afraid or because of unfair practices in the past.

— Keysha Williams

Questions & Guidance:
