PROGRAM DESCRIPTIONS

Presented by the Alzheimer's Association®

COVID-19 and Caregiving

Caring for someone living with dementia during the COVID-19 pandemic adds unique challenges. This program provides simple tips caregivers can put in place whether the person living with dementia lives at home, in a residential facility or care providers are coming into the home.

Dementia Conversations

Learn helpful tips to guide you in having difficult conversations with family members, including going to the doctor, deciding when to stop driving, and making legal and financial plans.

Effective Communication Strategies

Teaches caregivers to decode verbal and behavioral communication by someone with dementia. Participants leave with strategies for meaningful connection with people in early, middle and late stage dementia.

Healthy Living for Your Brain and Body

Science is able to provide insights into how to optimize our physical and cognitive health as we age. Learn about research in the areas of diet and nutrition, exercise, cognitive activity and social engagement, and use incorporate these recommendations into a plan for healthy aging.

Legal and Financial Planning

A dementia diagnosis makes planning for the future more important than ever. Join us to learn about needed legal documents, finding legal and financial assistance, practical strategies for making long-term care plans, tax deductions and more.

Understanding and Responding to Dementia-Related Behavior

Provides participants with a four-step model to address behavioral aspects of dementia. The program details the model and then applies it to some of the most common behaviors associated with the disease.

10 Warning Signs of Alzheimer's

Alzheimer's and other dementias cause changes in memory, thinking and behavior that interfere with daily life. Join us to learn about 10 common warning signs and what to watch for in yourself and others. The program covers typical age-related changes, common warning signs of Alzheimer's, how to approach someone about memory concerns, early detection, the benefits of a diagnosis and the diagnostic process, and Alzheimer's Association resources.

Understanding Alzheimer's and Dementia

Alzheimer's is not normal aging. It's a disease of the brain that causes problems with memory, thinking and behavior. Join us to learn about the impact of Alzheimer's, the difference between Alzheimer's and dementia, Alzheimer's disease stages and risk factors, current research and treatments available to address some symptoms, and Alzheimer's Association resources.
